

## Sleeper walls

Crestwood Estate is situated at Molindinar on the Gold Coast. Crestwood is central to everything including Ashmore shopping centre, Marina Mirage and only ten minutes to Main Beach at Southport.

With over nine hectares of parkland, walkways, and bike paths, Crestwood has been developed by Australand over the past eight years to provide affordable, quality Gold Coast lifestyle land in an elevated position to catch the breezes. To maximize the usability of the land and create level blocks ranging from 400 to 800 square metres, extensive installation of Concrib Concrete Sleeper walls was carried out. Many the walls are up to 2.7 metres in height.

Since construction began on Stage 1 of Crestwood nearly eight years ago, and with the recent completion of Stage 13, there has been approximately twelve thousand square metres of Concrib Sleeper Walls constructed on the project.

### Need a sleeper wall?

Talk to the experts at Concrib. We have the knowledge and experience to tackle a variety of earth stabilisation, and construction projects.

Please contact us on (07) 3375 1800, or visit our website at [www.concrib.com.au](http://www.concrib.com.au) to see more examples of our work.
